Juneau, Alaska

In 1880, it was slow going for Joe Juneau and Richard Harris as they searched for gold with the help of Native guides. After climbing mountains, forging streams and facing countless difficulties, they found nuggets "as large as beans."

From their discovery came three of the largest gold mines in the world. By the end of World War II, more than \$150 million in gold had been mined. Eventually the mines closed, but the town Joe Juneau founded became the capital of Alaska and the business of gold was replaced by the business of government.

Some 30,000 people live in Juneau. Its total area makes it one of the biggest towns, in size, in the world. Only Kiruna, Sweden, and Sitka, Alaska, exceed Juneau's 3,248 square miles.

Today Juneau is famous not only for gold and government but also for its breathtakingly beautiful glaciers and stunning views of both water and mountains.
